DIGITAL FORENSICS: A PEEK BEHIND THE CURTAIN

Department of Defence Senior Forensic Analyst
Katy Griffis

FINGER PRINT SCANNING

JOIN US

The world is more connected than ever before, but on the Internet where people can be anyone they want, how do we start to unravel the anonymity and identify the real culprit? Digital forensics is the science of obtaining, analysing and interpreting evidence from digital media such as computers, mobile phones, servers, networks and much more.

Katy Griffis is the senior forensic analyst with the Australian Department of Defence. She's been a member of ANZFSS since 2009 and has an academic background in criminology and forensic psychology.

These days, she spends her time with her head in cyber space, tracking malicious actors and autopsying computers.

Join Katy for peek behind the digital curtain, as she:

- explores the overlap between digital and traditional forensics
- deciphers the art of how 1s and 0s translate into evidence
- talks through cases where digital forensics has been both the make and break factor
- discusses the challenges of tomorrow's investigators

WHERE
Lancer Barracks
2 Smith Street
Parramatta NSW

WHEN
6.30pm - 9.30pm
Thursday 25th February 2021

COST
Members & all students: Free
Non Members: \$10
Nibbles and drinks provided
