

The Forensic and DVI Response to the Downing of MH17

In 2014, Malaysian Airlines Flight MH17 crashed in Ukraine. 41 passengers who were temporary or permanent residents of Australia perished, the largest single loss of Australian lives offshore since the Bali Bombings in 2002. The Australian Government launched Operation Bring them Home, to search, recover and identify the Australian victims.

National Manager Specialist Operations with the Australian Federal Police, Simon Walsh's presentation will detail the Forensic and victim identification aspects of this operation.
